

New smoking fetish videos added at [Smoking Flicks](#)

We've added two new smoking fetish movies at [Smoking Flicks](#) – the smoking movie streaming and video download site.

BRAND NEW RELEASE! 18-year old Marissa started smoking seven years ago – but she's never given oral sex on camera until now. It turns out she's a pro at both, and since she's a committed smoker, she loves doing them both at the same time. The first section of this video is an interview, in which Marissa tells all about how she started smoking so young; in the second half, she goes at the smoky BJ with great excitement, dragging hard before going down and usually letting the smoke flow from her nose, all the way up to a messy boob-and-facial finish.

And we have the first half of Random Snaps Volume 12, which in our view was their sexiest release ever. Frida and Maddie show off their incredible smoking in a number of group scenes; there's no overtly sexual activity other than smoke exchanges, but all of the scenes crackle with sensuality in addition to the amazing frenches, snaps, nose and mouth/nose exhales, series of smoke rings – and lots, lots more.
